1. Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce vel sem et nisl consectetur porta vitae eget diam. Donec consequat magna vitae nisi tristique dictum id non ipsum. Mauris non mi porta dolor ullamcorper tincidunt. Ut volutpat est nec mi aliquet auctor eleifend nisl ornare. Donec dapibus nunc at purus fermentum pretium laoreet justo fringilla. Nulla pellentesque vulputate nisl eu bibendum. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer mattis libero non erat rhoncus tincidunt. Etiam quis ante ut magna feugiat venenatis. Mauris cursus massa non augue aliquam mollis. Fusce dictum, ante quis dapibus scelerisque, velit leo faucibus est, laoreet convallis eros ligula eget orci. Phasellus lobortis tortor id sapien commodo elementum. Sed sed egestas dolor. Nulla massa ligula, dignissim sed auctor a, ullamcorper ac velit. Vivamus porttitor tempus bibendum. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

1.1 Local Group

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce vel sem et nisl consectetur porta vitae eget diam. Donec consequat magna vitae nisi tristique dictum id non ipsum. Mauris non mi porta dolor ullamcorper tincidunt. Ut volutpat est nec mi aliquet auctor eleifend nisl ornare. Donec dapibus nunc at purus fermentum pretium laoreet justo fringilla. Nulla pellentesque vulputate nisl eu bibendum. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer mattis libero non

erat rhoncus tincidunt. Etiam quis ante ut magna feugiat venenatis. Mauris cursus massa non augue aliquam mollis. Fusce dictum, ante quis dapibus scelerisque, velit leo faucibus est, laoreet convallis eros ligula eget orci. Phasellus lobortis tortor id sapien commodo elementum. Sed sed egestas dolor. Nulla massa ligula, dignissim sed auctor a, ullamcorper ac velit. Vivamus porttitor tempus bibendum. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

1.2 History of Local Group Research

1.3 Aim of This Thesis

2. Hubble Flow

3. SIBELIUS project

4. Findings from DMO Halo Catalogue Analysis

4.1   Hubble Flow Fitting

4.2   Local Anisotropy of the Hubble Flow
Figure 4.1: Radial velocities of haloes as a function of distance. Best fit to Hubble flow shown with solid line. Nearby points ignored when fitting shown in gray.
Figure 4.2: Hubble flow with colours depicting angular disstance from line connecting Milky Way and Andromeda counterparts in simulation.
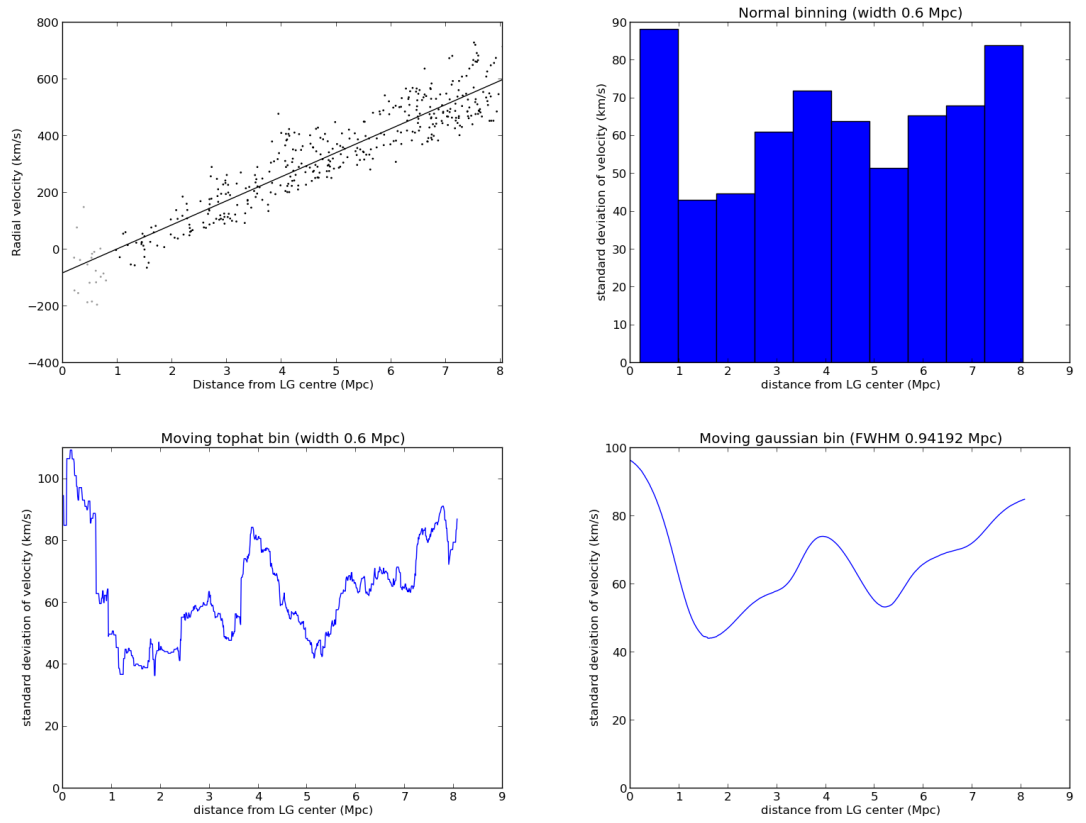

**Figure 4.3:** Velocity dispersion of Hubble flow.

Figure 4.4: Haloes with distances between 2 and 5 Mpc as seen from Mily Way counterpart in simulation. Colours depict deviations from best linear Hubble flow fit ignoring haloes up to 2 Mpc away, blue end meaning haloes coming closer faster than expected and redder colours moving away.
Figure 4.5: Dark matter haloes with distances from 2 to 5 Mpc grouped to clusters using DB-SCAN clustering algorithm. Parameters used for this plot were ms=5 and eps=2.

**Figure 4.6:** Median number of clusters found with constant eps on different minsamples.
Figure 4.7: Mean number of clusters found with constant ms on different eps.

Figure 4.8: Standard deviation of velocities within cluster as a function of distance.

5. Statistical Estimate of the Local Group Mass?

6. Conclusions
